

We make a variety of chains for the asphalt and paving industry. The combination of hard aggregates, asphalt, and the necessity to run almost continuously during the paving season calls for tough chains with long wear life.

Paving Machines

When hot asphalt arrives at a road construction site, the mix flows from dump trucks into the paving machine hopper. An asphalt paving machine uses a special scraper conveyor to transfer hot asphalt from the hopper to the road surface. We have designed chains specifically to fit O.E.M. equipment and to function in this hot, abrasive environment.

Paver Chains

All dimensions are in inches unless otherwise indicated.

Dwg. No.	Pitch	Width				Roller	Pin	Sidebar			Attachment				Bearing Area (in. ²)	Average Ultimate Strength (lbs.)	Work Load (lbs.)	Approx. Weight (lbs./ft.)
		Overall	Pin Head to CL	Pin End to CL	Inside				Hgt.	Th.			Rivet Dia.					
		A	B	C	E	D	G	H	T	P	J	R	S	K

20842	3.075	3.37	1.55	1.83	1.25	1.25	.63	1.50	.38	1.88	1.70	2.38	3.31	.77	1.09	56,900	4,375	7.6

Asphalt Plants

Three types of chains are typically used in asphalt plants:

- Inclined Scraper Conveyor Chains are used to move the asphalt mix into storage hoppers.
- Drive Chains are used on rotating drums to mix the aggregate and asphalt.
- Bucket Elevator Chains are used to move aggregates to storage silos and are sometimes used to move the asphalt mix to storage hoppers.

Tsubaki supplies Inclined Scraper Conveyor Chains in 4" to 6" pitch with both K- and slotted-M-style attachments. These chains are designed and constructed to give the best combination of strength and toughness. The chains are balanced to ensure continued safe operation. Sidebars are hardened to resist the impact loading that may occur. Rollers are specially heat-treated to resist outside diameter abrasion inherent in asphalt conveyors. These special features make our chains long-lasting and keep your operation running smoothly.

K-11 Style Attachment

K-1/K-2 or K-3 Style Attachment

K-2 or K-44 Style Attachment

MM-1 Style Attachment
