

Less Noise

Low Noise Drive Chain — SN Roller Chain —

Tsubakimoto introduces its original spring roller for use in roller chain.

When Tsubaki's SN Roller Chain engages with the sprocket, the new spring roller absorbs the force of the impact. The lower impact force results in lower noise levels. Compared with Tsubaki's standard RS Roller Chain (pre-lubricated), noise levels of SN Roller Chain are 6~8 dB lower.

©RS is a registered trademark of the Tsubakimoto Chain Co.

What the change to Low Noise offers

- Reduction of noise generated by machines and equipment in the workplace helps improve the overall work environment.
- Belts were considered as a countermeasure to noise, however, there are many limitations in terms of application, strength and overall cost. Taking these factors into consideration Low Noise Chain is the perfect countermeasure.
- Can be used in applications where the strength of a roller chain is required without the accompanying noise. (Theatrical stage lifts and others)

Features

① Low noise

Compared with Tsubaki's standard RS Roller Chain (pre-lubricated), noise levels of SN Roller Chain are 6~8 dB lower.

- Test Conditions
Chain tension: 3.92 kN (881 lbs)
Lubrication: Pre-lubricated only
Measurement position: 300 mm (11.81 in.) from the drive sprocket
- Test Chain
 - RS50SN (Low Noise Drive Chain)
 - RS50 (Std. Roller Chain)

② Interchangeability

Directly interchangeable with Standard Roller Chain

※ **Note:** As there are limits to the drive power of SN Roller Chain, please check the drive power charts on pages 3~4 when making your selection.

Use

Product Type and Dimensions

The connecting link for RS80SN is a cottered pin type.

Unit: mm (inch)

WARNING

USE CARE TO PREVENT INJURY COMPLY WITH THE FOLLOWING TO AVOID SERIOUS PERSONAL INJURY

1. Guards must be provided on all power transmission and conveyor applications in accordance with provisions of ANSI/ASME B 15.1 1992 "Safety Standards for Mechanical Power Transmission Apparatus" and ANSI/ASME B 20.1-1990 "Safety Standard for Conveyors and Related Equipment", or other applicable standards. When revisions of these standards are published, the updated edition shall apply.
2. Disconnect power, Always lock out power switch before installing, removing, or servicing unit. Comply with Occupational Safety and Health Standards 1910.147 "The Control of Hazardous Energy (Lock Out/Tag Out)".
3. Install in proper enclosure in accordance with NEMA 250-1991 "Enclosures for Electrical Equipment (1000 Volts Maximum)" and NFPA 496 1993 edition "Purged and Pressurized Enclosures for Electrical Equipment, 1993 Edition".
When revisions of these standards are published, the updated edition shall apply.
