

Tsubaki Advantage Success Stories

Application No.	7606
Industry	CONSTRUCTION-Cement
Application Name	Clinker Reclaimer
Issue	This application was moved up from another site. The OEM was no longer around, and the chain was in really bad shape. It was a live bottom trailer in its past life that was being turned into a clinker reclaimer.
Tsubaki Solution	Tsubaki brought their technical team in to reverse engineer the application. We were able to provide a complete drop in solution including complete shafted assemblies with sprockets, shafts, fabricated chain, fabricated attachments and hardware. This was a drop in for an application that they had no information about.
Cost Savings	0
Product Type	Conveyor Chain-Attachment Chain
