

Tsubaki Advantage Success Stories

Application No.	7927
Industry	FOOD-Red Meat
Application Name	Cartoning
Issue	The customer was looking to replace a competitor chain and had concerns of the quality of the chain due to its origin and performance on the application.
Tsubaki Solution	Tsubaki was called in to identify the chain. When on site we found that it was relatively a common chain for us and were able to cross it over in minutes. We provided a quote and drawings for this chain quickly. When the chain was provided to the customer it was exactly what they needed and the added Neptune coating that provided superior corrosion resistance over the previous chain they were using.
Cost Savings	0
Product Type	Attachment chain
