

Tsubaki Advantage Success Story

Application No.:	8265
Industry:	FOOD-Food Processing
Application Name:	Dryer Side Chains Stage 1
Issue:	The customer's Stage One Dryer chains, supplied by Aeroglide/Renold, were being changed annually. Chains were elongating, causing connecting pans to pull apart.
Tsubaki Solution:	Tsubaki offered and installed 6PITCH172P-LH/RH SPEC, which included upgraded materials. 17-4 heat treated stud-style bushings allowed for a bigger pin and a larger surface contact area for the roller. Case hardened sidebars provide for greater wear- resistance. The Tsubaki Chain has been running for 3 years and still under 2% Elongation. End user has ordered chains for Stage 1 & 2 at a sister plant with the same application.
Cost Saving:	2,708.38
Item No.:	6PITCH172P-LHSPEC Drawing No. 27618 6PITCH172P-RHSPEC Drawing No. 27618
Product Type:	Engineered Class Chain-EC Roller Conveyor Chain
