

**Tsubaki Advantage Success Stories**

<b>Application No.</b>	8332
<b>Industry</b>	FOOD-Bakery
<b>Application Name</b>	Cartoner RA Jones
<b>Issue</b>	Timing on this application is critical. The customer previously would just buy the standard OEM chain but continued to have downtime and wanted a better solution. The other problem was that they had to go through multiple steps to get an approval to change the supplier / vendor.
<b>Tsubaki Solution</b>	Tsubaki reverse engineered the specialty attachment chain and looked to make improvements. The improvements that were made included a tight press fit pusher lug where the OEM had a loose-fitting pusher. We added our Lambda lube free option to extend the life of the chain since tolerancing was such an issue we also pre stretch, matched and tagged the chain. We used a special hardened stainless-steel pusher for added strength and to ensure the product didn't transfer ink and mark the boxes. The approval process was completed without an issue as we provided drawings for all the components they would be ordering, and they were confirmed to be dimensionally the same as what was there.
<b>Cost Savings</b>	TBD
<b>Product Type</b>	Attachment Chain
