

Tsubaki Advantage Success Stories

Application No.	4253
Industry	BEVERAGE & BOTTLING-Bottling & Beverage
Application Name	Bottles cleaner conveyor
Issue	Bottles cleaner is a very hard, heavy loaded, warm, steamy and chemically demanding application. Customer was using a Competitor stainless steel chain to prevent corrosion, but the chain lasted only 6-month period because it stretched way too fast.
Tsubaki Solution	Tsubaki Neptune chain is known for its strength and its very good corrosion resistance against detergent, used in bottle wash application. Because wear was the main problem and the chain was not in direct food contact, customer agreed to chain and try the Neptune. Since the Neptune chain is about 6 times stronger than Stainless steel and has a sufficient corrosion resistance, customer gave it 400 days of operation without issues. On the final, the chain last more than 4 times the life span of the competition choice even if ours cost less to acquire.
Cost Savings	3,282.06
Product Type	Corrosion Resistant Drive Chain-Corrosion Resistant Drive Chain
