

Tsubaki Advantage Success Story

Application No.:	#8620
Industry:	FOOD PROCESSING-POTATOES
Application Name:	Potato Intake Drive
Issue:	Current using Tsubaki Standard 60 and 80riv Carbon steel chains. Challenge is high dust area, wet, starch environment. Chain would corrode and stretch, cannot lubricate due to dust. Has to change out every 4-6 months. 1hr x\$100, plus \$1000 outage
Tsubaki Solution:	Offered originally 60LAMNEPR100. They purchased and tried. Has been working very well. Recent added 80LAMNEP240P. With Lambda Neptune chains, covers all their areas of concern.
Cost Saving:	Even though the Lambda/Nep is 8x more money, Customer have got a year and counting out of the 60LAMNEP so far and chain is still good. ROI 1 year. Cost savings after 1 year, is \$1100 per change out x 2= \$2200.00. the purchased 100ft reel. Does around 10 drives= \$12,200 per year in cost savings. 80LAMNP cost savings is in process
Product Type:	VIP ROLLER CHAINS
