

Tsubaki Advantage Success Stories

Application No.	7923
Industry	FORESTRY Sawmill – Pulp & Paper
Application Name	Incline Conveyor
Issue	The customer was looking to replace a backstop on an incline conveyor at a pulp mill. The existing unit was obsolete. As a result, to source the same replacement unit the price and delivery was substantial.
Tsubaki Solution	<p>Tsubaki was able to cross the obsolete backstop over to a BS135 Series backstop. The unit was stock in Mississauga in the form of a knock-down kit that was sourced from Tsubaki Japan.</p> <p>Tsubaki of Canada was able to finish, quality test and ship quickly and was able to pass on significant savings up front to the end customer.</p> <p>To date, the customer has saved \$9543.09 and counting. Future replacement of this backstop is not expected for many years.</p>
Cost Savings	9,543.09
Product Type	PTUC- Cam Clutch
