

Tsubaki Advantage Success Story

Application No.:	4707
Industry:	Forestry - Sawmill
Application Name:	Outside logs conveyor CONV. 1601
Issue:	The barrels and pin on Cam's standard WH132 chain cracked several times.
Tsubaki Solution:	<p>Tsubaki suggested upgrading Cam's standard WH132 to Tsubaki's WH132XHDIBR. The XHD increased the thickness of the sideplates increasing fatigue strength and rigidity. The IBR added Induction-Hardened Barrels & Pins for increases wear resistance. This increased life from 740 to 1437 days and resulted in a significant \$13,343.16 cost savings.</p> <p>Additionally customer chose to purchase both the chain and sprockets from Tsubaki to ensure compatibility</p>
Cost Saving:	\$13,343.16
Product Type:	WH132XHDIBR
