

## Tsubaki Advantage Success Stories

<b>Application No.</b>	10118
<b>Industry</b>	Forestry – Lumber Mill
<b>Application Name</b>	Planer Drive
<b>Issue</b>	<p>A large lumber mill was using a standard RS80 riveted chain which was failing after 2-3 months of installation due to rapid elongation caused by the high speed of the drive and the inability to properly lubricate the chain due to the amount of sawdust that would stick and cake to the lubricant that would cause an improper conveyance of the drive.</p>
<b>Tsubaki Solution</b>	<p>To combat the rapid elongation issue, Tsubaki recommended a switch to one of our VIP chains, the Titan Series.</p> <p>Titan’s specially coated pins and PerforMax bushings (with lube grooves) provide better oil retention and provide a lower Coefficient of Friction between the pins and bushings resulting in longer wear life.</p> <p>By switching to Tsubaki’s Titan chain, the drive chain now gets an average life of 8 months, drastically reducing purchase cycles and maintenance time in switching and maintaining the chains.</p>
<b>Cost Savings</b>	Cost Savings Annualized @ \$2143.70
<b>Product Type</b>	Titan / Speedmaster
