

Tsubaki Advantage Success Stories

Application No.	7430
Industry	MANUFACTURING-General Manufacturing – Tire Recycling
Application Name	Cable carrier mat conveyor
Issue	<p>The customer used to have a Gortrack carrier and the load was too heavy for the capacity, resulting on a very bad self-support up to a point that if they try to take the carrier for a second year of usage, they started to have operational issues.</p> <p>They took the habit of changing the carrier once a year on the main shutdown.</p> <p>*Picture show the used carrier the day of our initial service call.</p>
Tsubaki Solution	<p>We took our time to go see the applications, measure the carrier load while noting the cable and hoses population. Translated the information into our catalogue and found a carrier that has a better linear load capacity. The Varitrak S1250 was right on the spot, bridging the gap of the required additional capacity and costing not much than 20% more than the old carrier.</p> <p>The cost saving below is still accumulating after close to 3 times the life span of the previous carrier.</p>
Cost Savings	\$4,961.90 and counting as of 2022-02-21
Item No.:	S1250 VARITRAK S CARRIER
Product Type	Cable Carrier
