

# When Strength & Extended Life Matter, Trust Tsubaki!

Tsubaki's exclusive patented ring coined connecting link has a fatigue strength equal to that of the chain itself - *THAT MEANS NO LOSS IN STRENGTH!*

Long Lasting *Solid Rollers* Provide Greater Fatigue Life and Durability at High Speeds

*Precision Riveting Process* Helps to Withstand Side Load Impact

*Wide Waist Link Plates* Provide Tensile Strength and Maximum Allowable Load that *Exceeds ASME (ANSI) Standards*

## Our Latest Innovation – Tsubaki Performax™ Bushings.

*Performax Bushings - The Science Behind Tsubaki*

Advanced technology allows us to combine the reliability of a solid bushing with our one-of-a-kind patented lube grooves on the inner surface *increasing the chain life by 34%.*

## Two-Pitch Offset Link

- Combination of roller link and offset link
- Unlike standard single-pitch offset links where a cottared slip-fit pin is used to assemble into chain resulting to 35% loss of strength, *two-pitch offset links use a press fit, quad riveted pin\* resulting to NO LOSS OF STRENGTH.*

\*Size 35 and above.
